

# Olacid<sup>+</sup>dry

**Feed Acidifier**

## *Healthy gut, Healthy Bird*

The feed additives have a number of beneficial effects in the control of pathogenic microorganisms and enhance the growth of beneficial microorganisms. Health of the gut is one of the major factors governing the performance of birds and thus, the economics of poultry production and the profile of intestinal microflora play an important role in gut health.

Dietary organic acids and their salts are able to inhibit microbial growth in the food and consequently to preserve the microbial balance in the gastrointestinal tract. In addition, by modifying intestinal pH, organic acids also improve the solubility of the feed ingredients, digestion and absorption of the nutrients.

# The antimicrobial properties of organic acids and essential oils

LEMONGRASS OIL

ORGANIC ACIDS

## BENEFITS

- Reduces pH of feed and gut
- Has bactericidal effect
- Lemongrass oil has anti-bacterial, anti-helminthic activity
- Enhances digestive process by promoting normal gut flora & gut integrity
- Thermostable and safe at pelleting temperature
- Potentiates enzymatic activity in the GUT by efficient release of enzymes

## INDICATIONS

- Reduces pathogen load in feed & gut
- Reduces incidence of Salmonellosis and Colibacillosis
- Improve digestibility and assimilation of nutrients
- For better feed conversion & performance

**Dosage:**  
1kg/ton of feed

**Packing:**  
25 kg
