

QUADRAMICIN

Enramycin 8% feed additive

QUADRAMICIN contains Enramycin 8% as its active ingredient which is a potent polypeptide antibiotic.

Each 1 Kg contains:
Enramycin 80 g
Excipients q.s

BENEFITS

- **Quadramycin** has strong antibacterial activity against Gram positive bacteria, and shows the strongest activity against *Clostridium perfringens*, which is the main cause of poor growth and wide spread incidence of Necrotic enteritis
- It acts on the cell wall of bacteria preventing **peptidoglycan synthesis**, causing cell wall lysis leading to the destruction of the bacteria
- It rarely induces cross-resistance with existing antibiotics
- It is **gut acting** with no absorption, which minimizes concerns of drug residue
- **MIC** for **Quadramycin** is as low as under, 0.39 µg/ml. This makes it far more efficient than even Avilamycin and Bacitracin against pathogens
- **Reduces** ammonia levels in the intestinal contents
- Improves performance
- **Quadramycin** has a very stable performance and is active even during the process of pelletization

USAGE:

Poultry : 75g to 100 g/ ton of feed

PACK:

25 Kg Bags

* An animal feed supplement, not for medicinal use

INDICATIONS

- It is an excellent **growth promoter**
- **Reduces** wet droppings in poultry
- Improves feed efficiency at very low inclusion levels in feed for poultry and pigs
- **Increased** weight gain
- **Reduces** morbidity
